

DO YOUR TESTS MEASURE UP?

When it comes to choosing assessments, you have an important decision to make. Will your tests be inclusive or leave students out?

To reach more students, educators should look for these key features—all signs of a well-designed, equitable assessment:

- Covers math, reading, and English/language arts
- Science coverage, including the Next Generation Science Standards*
- Course-specific assessments for high school math
- Early learning assessments, including audio support and automatic fluency scoring
- Spanish reading and math assessments to support English-only, bilingual or dual immersion instructional programs
- Accessible for students with disabilities via built-in features or compatibility with external tools like refreshable braille
- Connects to popular instructional programs that cover all subjects and grades
- Predicts ACT® and SAT® exam readiness to help students understand the path to college and career
- Fully adaptive from grades K-12 to identify students' needs regardless of grade level

In relentless pursuit of our mission, NWEA® is committed to partnering with educators to help all kids learn.

That's not a sales pitch—that's a promise. As a not-for-profit, we develop inclusive solutions to positively impact students at every level. Let us use our 40+ years of assessment knowledge to help you find the perfect solution for your school, district, or state.
