

# How international schools partner with NWEA for student success

Over 2,300 international schools in more than 145 countries rely on NWEA® assessment tools and professional learning strategies. Our research-based assessments help international educators answer a crucial question: Are my students learning? By delivering precise information in real time about every student, we set educators and students up for success.

For over a decade, NWEA has partnered with international schools to provide the services they need to help students achieve, no matter where they live. We build strong relationships throughout the international community to leverage resources to support student growth.

## We offer precise, real-time information to:

- + differentiate instruction
- + evaluate impact of programs and interventions
- + accelerate students' academic growth
- + maximize instructional time for staff
- + target instructional and professional learning resources

## Our partnerships include:

- + the US Department of State and the Office of Overseas Schools
- + regional school organizations
- + accrediting organizations and education support services

**“When you’re an international school, you’re sometimes very isolated. However, having MAP® Growth™ to talk about student performance is something that brings us together to share our experiences.”**

**Amanda Briggs,**  
Assistant Principal of Academics  
Cobham High School, ACS International Schools, Surrey UK

## WHAT YOU NEED

## HOW WE HELP

---

### An external assessment to measure student growth

MAP Growth dynamically adjusts to each student to create a personalized assessment experience—whether a student performs on, above, or below grade level.

---

### To compare performance to students in the US

MAP Growth Norms give you a reliable comparison point of student performance in the United States. Our norms feature both achievement and growth percentiles for individual students and schools.

---

### To compare performance to other international schools

Our Global Partners Dashboard enables you to compare your school to other international schools in your region, country, membership organization, or worldwide.

---

### To know if your students are college and career ready

We offer the College Explorer tool, which helps students, parents, and teachers develop pathways to higher education. The powerful tool links MAP Growth scores with national benchmarks for colleges, universities, and even specific majors.

---

### To meet the unique needs of young learners

MAP Growth K-2 and MAP Reading Fluency™ include rich visuals and audio supports that are developmentally appropriate for early learners. The assessments work together to provide a comprehensive picture of every young learner's strengths and opportunities.

---

### A more complete picture of your Spanish-speaking students

The Spanish assessments, included as part of MAP Growth and MAP Reading Fluency, help you understand where Spanish-speaking students are on their learning journey with rigorous measures of reading, math, and early literacy skills.

---

### To ensure effective data use by staff

We offer live (onsite and virtual) and online professional learning to help educators make the most of their assessment data to differentiate instruction, set goals, and establish a culture of data use.

---

### Support when working with accreditation organizations

We partner with accreditation organizations to support schools in seeking and renewing their accreditation. Our solutions help you meet accreditation standards for the use of data in continuous improvement and performance measurement.

---

## Set your international students up for success
