

How private schools partner with NWEA for student success

Working together to meet the moment

At NWEA®, our research-based products and services help private school educators answer a crucial question: Are my students learning? By delivering precise, real-time information about every student's learning, we set educators—and students—up for success.

NWEA partners with more than 3,000 private schools to provide the trustworthy data they need to make instructional and operational decisions with confidence.

How private schools partner with NWEA

Our team understands the unique needs of private schools and is committed to building strong relationships throughout the private school community to support student achievement and growth.

Partner with us to:

- Accelerate students' academic growth and achievement
- Help young readers meet literacy goals
- Ensure students are prepared for college and careers
- Pinpoint intervention and enrichment needs
- Maximize classroom instructional time, staff resources, and budget
- Empower educators with robust, holistic professional learning

“MAP Growth gives teachers immediate results and helps them make data-driven decisions in the student's learning. It helps me as an administrator evaluate curriculum that drives our instruction. No matter where the students are in their learning process, we can always measure their growth.”

Deb Larson, Assistant Head of School and Principal of Learning & Innovation
Maranatha Christian Academy, MN

YOU NEED

HOW WE HELP

A measure of student growth

MAP Growth dynamically adjusts to each student to create a personalized assessment experience—whether a student performs on, above, or below grade level. Every question is calibrated to our proprietary RIT scale. Since the scale is continuous across grades, educators trust it to track longitudinal growth over a student’s career.

To meet the unique needs of young learners

MAP Growth K-2 includes rich visuals and clear auditory prompts. In addition to the interim assessment, you receive skill-focused assessments teachers can use to quickly gauge skill development in between more formal checkpoints.

Available for grades pre-K-5, MAP® Reading Fluency™ is a benchmark and progress monitoring assessment that measures oral reading fluency, literal comprehension, and foundational skills for an entire class in about 20 minutes. Speech-recognition technology, an included dyslexia screener, and automatic scoring help educators support young readers while preserving valuable instructional time.

To compare performance to other private school students

NWEA now has user norms based on the growing number of students at private schools using MAP Growth. These user norms are the criteria for our [Achievement and Growth Tables for Private Schools](#). This interactive tool provides context on the typical patterns of achievement and growth in mathematics and reading, specifically for private school students.

Evidence-based professional learning tailored to your team

Our robust, holistic professional learning experiences go beyond product training and empower teachers to use data to advance student achievement. Whether onsite or virtual, our expert-led workshops are designed around your unique goals and challenges.

To know if your students are college and career ready

Our adaptive test aligns to state standards and Common Core, MAP Growth college readiness benchmarks, and [College Explorer](#)—a powerful tool that links MAP Growth scores with national benchmarks for colleges, universities, and even specific majors.

Set your private school students up for success
